

SOFTWARE ENGINEER

I really enjoy coding and hunting down bugs. I drive company missions through teamwork, R&D, and innovation. Furthermore, I use collaborative experience sharing to make company stronger and move forward. Thinking out of the box is magic recipe that I use to make systems stronger and optimised.

JAYANT MALIK

EDUCATION

Vaish College of Engineering – MDU Rohtak

B.Tech CSE

Aug 2018 – Jun 2022

A learning journey that will never be forgotten, taught us skills to make computers work hard for us and made some good friends to spend time while computer calculates value of PI.

Harvard X: CS50 – USA

Web Dev with Python and JS

Jul 2019 – Oct 2019

David was an excellent coordinator along with Brian our main Instructor during the course. The lectures and assignments provided a future ready foundation to face real world challenges.

Harvard X: CS50 – USA

Intro to Computer Science

Aug 2018 – Nov 2018

David was an excellent coordinator along with Brian our main Instructor during the course. The lectures and assignments provided a future ready foundation to face real world challenges.

MY PROJECTS

Eatoes

<https://www.eatoes.com>

We help you find delicious food options nearby and allow you to quickly browse through food reviews before ordering, but you also want the option to order via mobile. Well, now you can with our app.

Mices

<https://developbharat.github.io/MicesWebsite>

This is an android application built using Jetpack Compose for a private business to generate invoices and patient reports. You can check it out on playstore.

Thank You

REACH ME TO KNOW MORE
